Slickpix Art — Website Build Proposal

Client: Lou + Mike (Slickpix Art) **Project:** `slickpix.art` — new site + online shop **Prepared by:** Bailey, AutoOS · **Date:** 2026-04-22

---

1. Scope of Services

1.1 In scope

Launch deliverables

- **Website.** Custom-built commerce site for SlickPix.art — shop, commissions intake, and brand-forward design. Demo mock-up attached for illustration only; final design and layout refined to your direction.
- **Commission intake form.** Captures the brief and client details for easy follow-up.
- **Checkout + auto-fulfilment integration.** Payment processing and print-on-demand fulfilment integrated into the site.
- **SEO foundation.** Titles, descriptions, metadata, sitemap. Visibility on launch.
- **Launch walk-through.** Adding products, editing pages, running test orders.

Ongoing support

- **Hosting + security check-ins.** Patches applied, host kept healthy, site stays live.
- **Uptime monitoring + breakage response.** Same-day fix if the site goes down or checkout breaks.
- **Content updates.** Small copy, image, and product edits handled as they come in.
- **SEO upkeep.** Titles, metadata, and alt text refreshed as your catalogue grows.

1.2 Future scope

- **Automated commission invoicing**
- **Automated enquiry reply**
- **Self-edit layer**
- **Commission tracking board**
- **AI FAQ assistant**

2. Decisions

2.1 Stack

Our recommended stack: **Render + Stripe + a custom-built site**, with **Gelato** or **Printful** for fulfilment.

- **Render** — hosting. Free at your traffic level. Changes we push go live automatically.
- **Custom-built site** — built and maintained in-house. Optimised for desktop and mobile, with design flexibility built in.
- **Stripe** — online payments (see §2.2).
- **Gelato / Printful** — print-on-demand fulfilment (see §2.4).

Content edits go through us at first — fastest way to ship. A self-edit layer is available as future scope (§1.2) once customer engagement justifies it.

2.2 Payment processor — Stripe

Option	Pros	Cons
Stripe *(our recommendation)*	No monthly fee; pay only per successful charge (see §2.3); industry standard for online e-commerce; AU-based support and payouts	Separate dashboard from your in-person Square
Square Online	Unifies with your in-person terminal	Square's hosted storefront (~AU$45/mo for the custom-domain plan) locks you into their templates, ruling out a custom-built site. It also doesn't integrate with our recommended cart software, Snipcart.
Shopify	All-in-one platform, one login for everything	Per-sale platform fee on top of card fees; you've told us you're done with it

Our recommendation: Stripe for online payments. Keep Square as your in-person reader — its in-person rates beat any online processor.

2.3 Stripe transaction fees

Stripe has no monthly or setup fee. Per successful charge:

Card type	Fee (AU, April 2026 — confirm at Stripe onboarding)
AU card (domestic online)	1.7% + AU$0.30
International card	3.5% + AU$0.30
Payouts to AU bank	Free, ~2 business days

Worked examples: a AU$750 commission on an AU card → AU$13.05 in fees. A AU$50 t-shirt → AU$1.15.

2.4 Print-on-demand fulfilment — Gelato (or Printful)

Option	Pros	Cons
Gelato *(recommended)*	Sydney and Melbourne print nodes ship faster and cheaper to AU buyers, direct from printer to customer	Smaller catalogue than Printful
Printful *(credible runner-up)*	Bigger product catalogue; stronger if you pick up US or UK orders	AU fulfilment routes through partner facilities — slower and pricier for Victorian buyers

Our recommendation: If you're already on Gelato or Printful, we'll integrate with it. If another print-on-demand service is preferred, let us know and we'll check compatibility and confirm.

2.5 Site stack

Option	Pros	Cons
Custom-built site + Snipcart *(our recommendation)*	New features on request. Built and maintained in-house. Fast on mobile. Adaptable — layout changes and integrations without platform limits.	Content edits come through us at first.
WordPress + WooCommerce	Familiar platform; easy template-based setup	Ongoing plugin and security maintenance for the life of the site; less compatible with your preference to keep things hands-off.

Our recommendation: Custom-built wins on maintenance and flexibility. Snipcart handles cart, checkout, and shipping — same shop experience as WooCommerce, maintained by us instead of you.

3. Pricing

3.1 Setup (delivered at launch)

Package	Fee (inc. GST)
Setup — §1.1 in-scope build, launch, walk-through	~~$1,600~~ **$950**
Total	**$950**

3.2 Ongoing costs

Two parts: a fixed monthly upkeep cost, plus an hourly rate for development work.

Item	Amount
Baseline upkeep — domain, security patches, uptime monitoring, content updates, SEO upkeep, breakage response	**$65/mo** (inc. GST)
Support and development work — layout changes, automation maintenance, future scope development (§1.2)	**$140/hr** (inc. GST)

Support and development covers anything we actively build or change for you, charged in 30-minute increments. Upkeep billing begins 30 days after launch.

Baseline absorbs all ongoing platform costs — Snipcart, domain renewal, and site infrastructure. Stripe transaction fees and print-on-demand product costs settle from each sale directly, not billed separately.

Response times.

- Site down or checkout broken — same business day, no charge
- Content or layout changes — within 3 business days
- Other requests — within 5 business days

3.3 Stages of work

Target: live within two weeks of sign-off. Same-day approvals at each checkpoint can shorten that to around 10 days.

1. Design direction confirmed. Content checklist sent.
2. Site scaffolded — logo, colours, layout approved.
3. Shop populated. Payment + intake tested end-to-end.
4. Launch on `slickpix.art`.

3.4 Terms

- **Setup fee.** 50% on sign-off, 50% on launch.
- **Upkeep.** Billed monthly in advance, starting 30 days after launch. Month-to-month.
- **GST.** All fees quoted are inclusive of GST. A tax invoice is issued for each payment.
- **Payment.** Invoices payable within 30 days of issue. Overdue invoices accrue 1.5% monthly interest after 30 days. We may pause work and support after 14 days' overdue notice.
- **Revisions.** Two consolidated feedback rounds per build stage (§3.3). Additional rounds billed at §3.2 rates.
- **Cancellation — mid-build.** If you cancel before launch, the 50% deposit is non-refundable and covers work completed to that point.
- **Cancellation — post-launch.** 30 days' written notice either way. On cancellation with all fees paid, we hand over hosting admin, source files, DNS control, and repo access within 7 days. Outstanding fees must be cleared before handover.
- **Ownership.** On receipt of final payment at launch, all code, content, and design files transfer to you. Admin logins and repo access follow within 7 days of launch.
- **Warranty.** We fix defects in delivered work free for 30 days after launch. Beyond that, changes are billed at §3.2 rates.
- **Content.** You warrant that all content you supply (photos, copy, logos) is yours or properly licensed, and indemnify us against third-party claims arising from it.
- **Liability.** Our total liability for any claim is capped at the fees paid in the prior 3 months. We're not liable for indirect or consequential loss.
- **Third-party services.** We're not responsible for outages, pricing changes, or policy changes by third-party providers (Stripe, Render, Gelato, Snipcart, domain registrar).
- **Governing law.** This agreement is governed by the laws of Victoria, Australia.

---

4. What we need after sign-off

All of the below within 48 hrs to hold the two-week timeline.

- **Domain access.** Registrar logins for `slickpix.art` so we can point DNS at Render.
- **Existing content.** Product photos, descriptions, pricing from the Shopify store — usable as-is. Light clean-up included; new photography isn't.
- **Print-on-demand service.**
  - *Already on Gelato or Printful:* let us know and we'll integrate it.
  - *Different service:* share the details and we'll check compatibility.
  - *Not yet set up:* Gelato account setup and integration included at no extra charge.
- **Logo files.** Highest resolution you have.

Sign-off

Sign and return within 30 days to lock the timeline. Work starts the Monday after sign-off.
